

Simão Santos

ABOUT ME

With a degree in Multimedia Engineering from the University of Alicante, I have been programming since I was 15, discovering and overcoming challenges through personal projects. I have developed both individual and team projects, mainly as a full-stack developer, covering REST APIs, websites, e-commerce platforms, web applications, and mobile applications. My approach is based on building practical and efficient solutions, tailored to the real needs of each project, and on continuing to learn something new with every job I do.
